

Coal Energy

Coal Energy in 2010

1. Countries Contribution: How much each country contributed in 2010.

Coal Energy Production of Countries in 2010

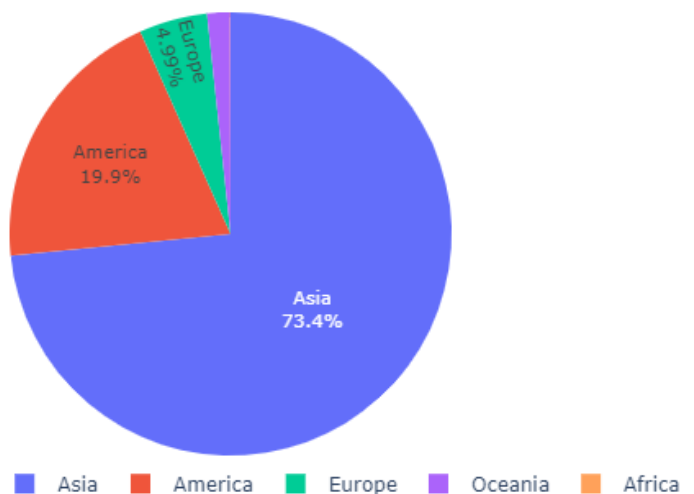

- The top 10 countries contributed about 96% of world share in Coal energy production.
- 5 out of top 10 countries are from Asia.
- China was the top producer of Coal energy covering 60%.

2. Continents Contribution: How much each continent contributed in 2010.

Coal Energy Contribution by Continents

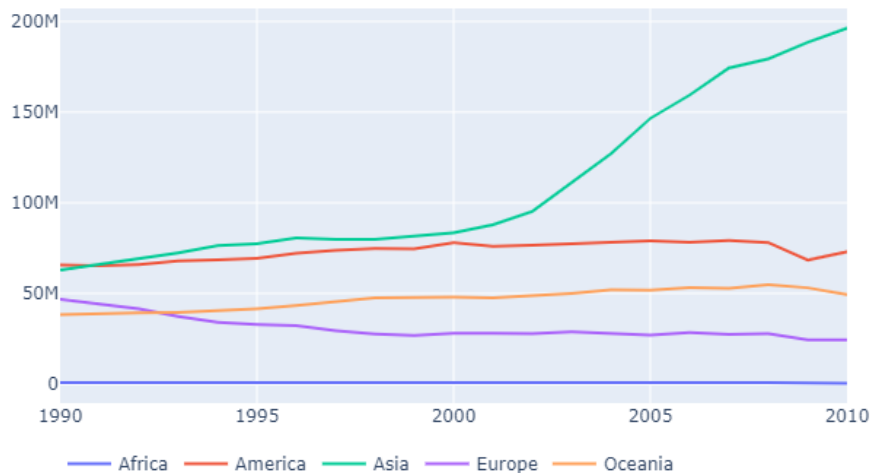

- Almost 75% of the world contribution of Coal energy in 2010 came from Asia.
- America contributed 20%.

Progress since 1990

1. Continents Contribution: Progress of each continent since 1990.

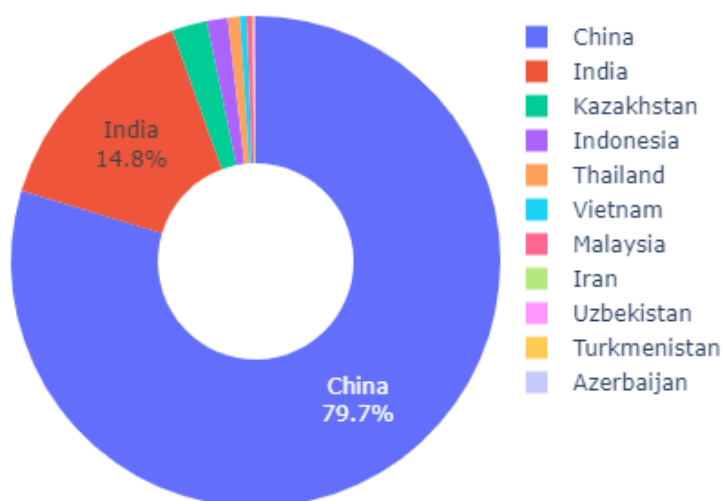

Coal Energy Progress in Continents

- Asia has always been providing the highest amount of Coal energy.
- Asia's progress sky rocketed since 2003.

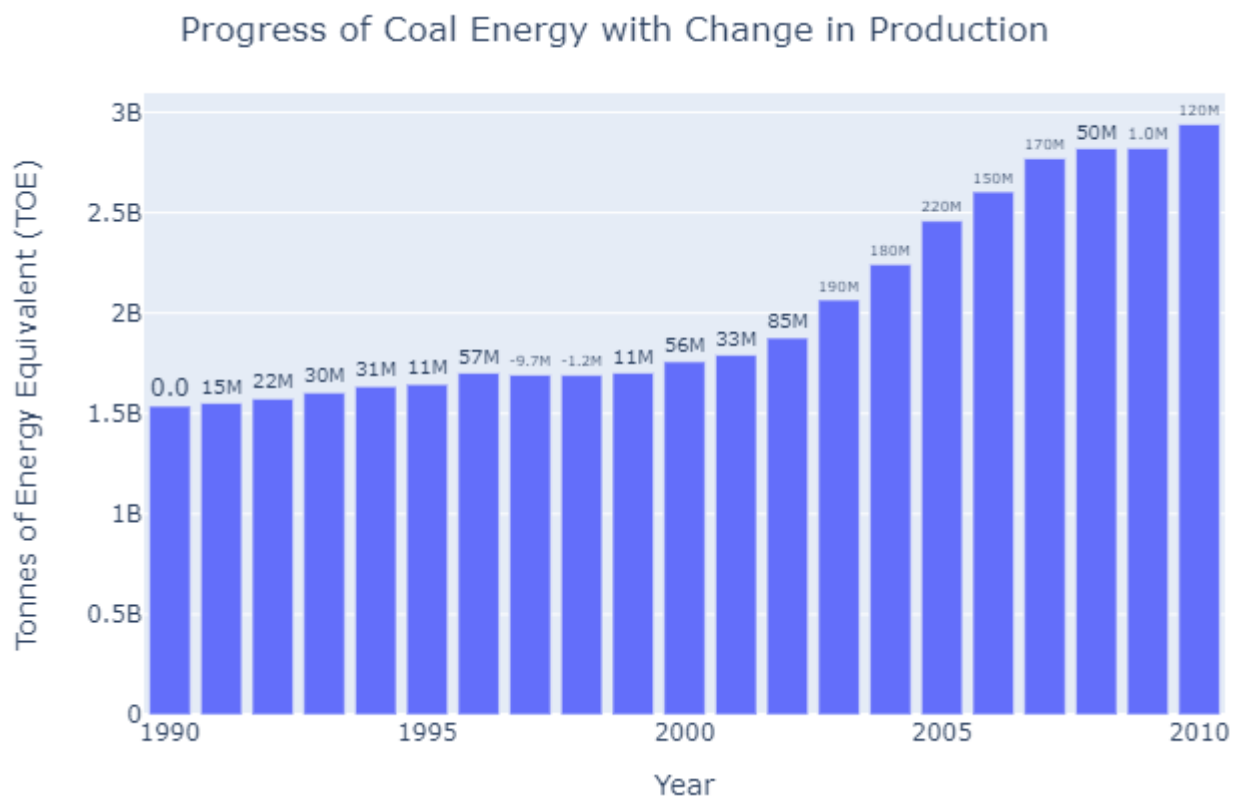

2. Asian Countries Contribution: Total contribution of countries in Asia since 1990.

Top Coal Contributors in Asia

- China contributed 80% of Coal in Asia energy since 1990.
- India and China together contributed 94% of Coal energy in Asia since 1990.

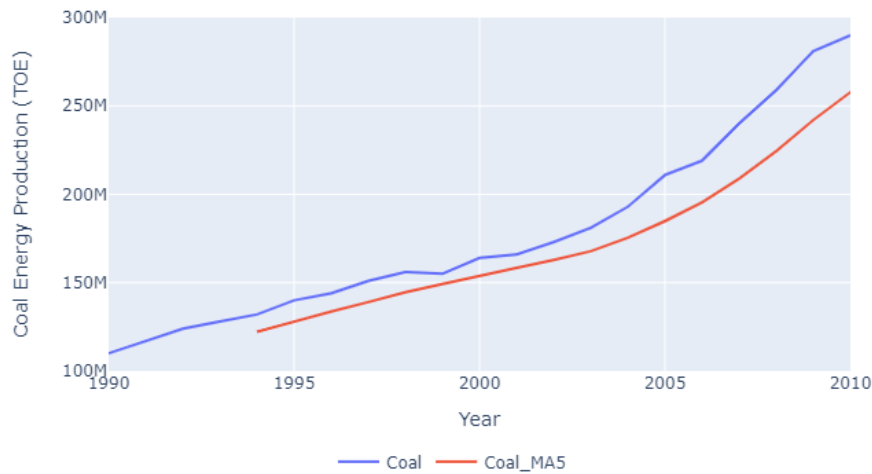

3. Overall Progress: Overall progress of Coal energy in the world since 1990. The values on the bar shows the increase/decrease in the energy generation in the successive years.

- The Coal energy production has increased by doubled in last 2 decades. From 1.5B in 1990 to 3B in 2010.
- Big increments have been made from 2003. The highest were during 2005 with a total of 220M increase year.
- 2010 saw the 6th highest increment of 120M.

India's Contribution: Progress of India in Coal energy contribution since 1990.

India's Coal Energy Production

- India's Coal energy is somewhat linear.
- India's production almost tripled since 1990 from 110M in 1990 to 290M in 2010.
- India had 9.8% of world contribution in Coal energy production in 2010.

Conclusion

- Asia is the leading continent in providing highest Coal energy production.
- China is the leading contributor in Asia.
- India's growth has almost tripled since 1990.
- 96% of world contribution comes from top 10 countries.
