

Oil Energy

Oil Energy in 2010

1. Countries Contribution: How much each country contributed in 2010.

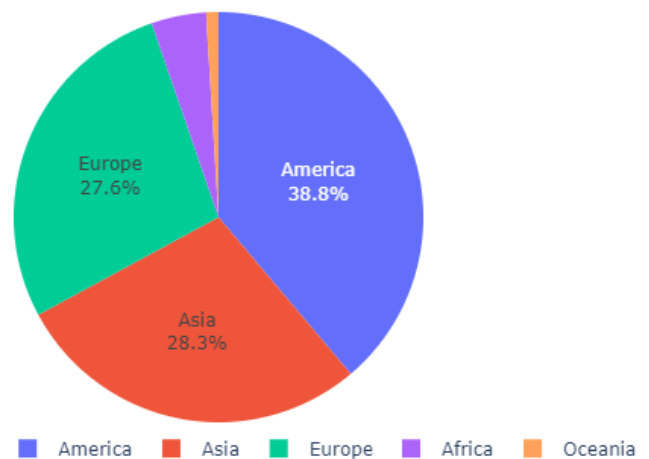

Oil Energy Production of Countries in 2010

- The top 10 countries contributed about 79% of world share in Oil energy production.
- 4 out of top 10 countries are from America.
- Russia was the top producer of Oil energy covering 20%.

2. Continents Contribution: How much each continent contributed in 2010.

Oil Energy Contribution by Continents

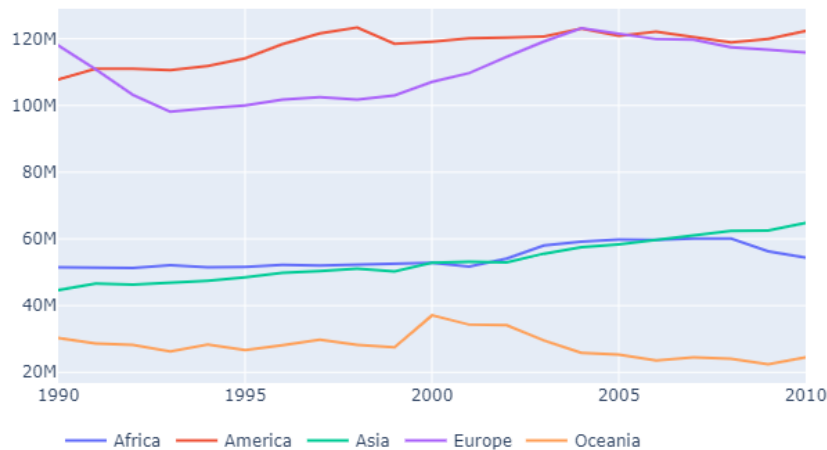

- America contributed 38.8% Oil energy in 2010.
- Asia generated 28% of Oil energy.

Progress since 1990

1. Continents Contribution: Progress of each continent since 1990.

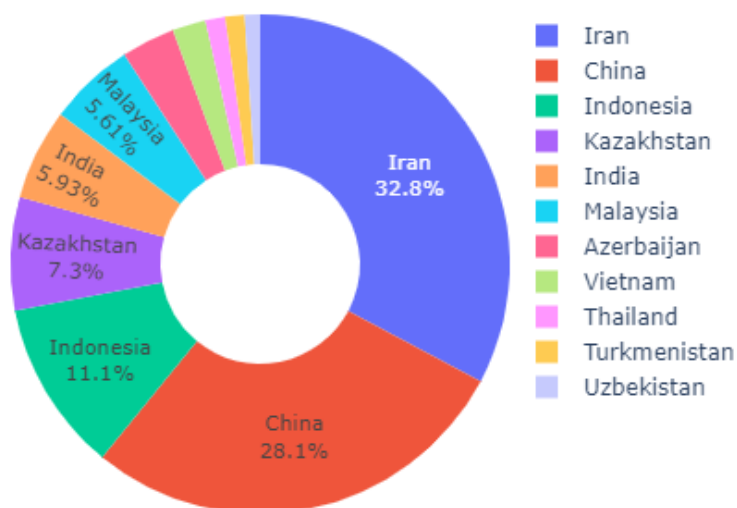

Oil Energy Progress in Continents

- America has been providing the highest oil energy while it received competition from Europe from 2004 to 2007.
- Asia overtook Africa to become the 3rd highest contributor in 2007.

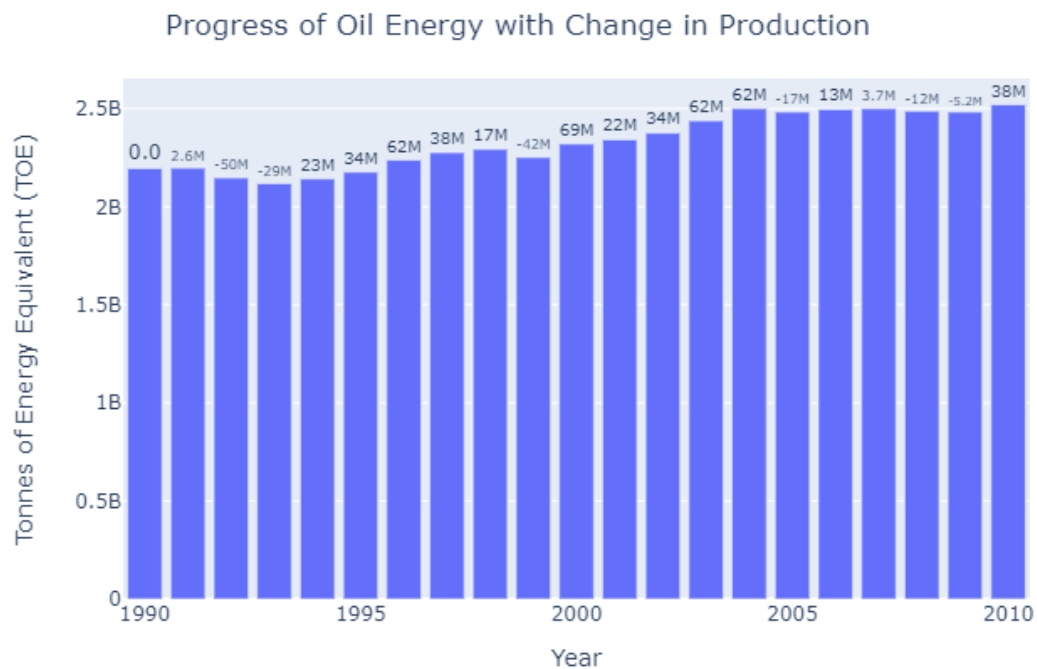

2. Asian Countries Contribution: Total contribution of countries in Asia since 1990.

Top Oil Contributors in Asia

- Iran contributed 30% of Oil in Asia energy since 1990.
- India contributed around 6%.

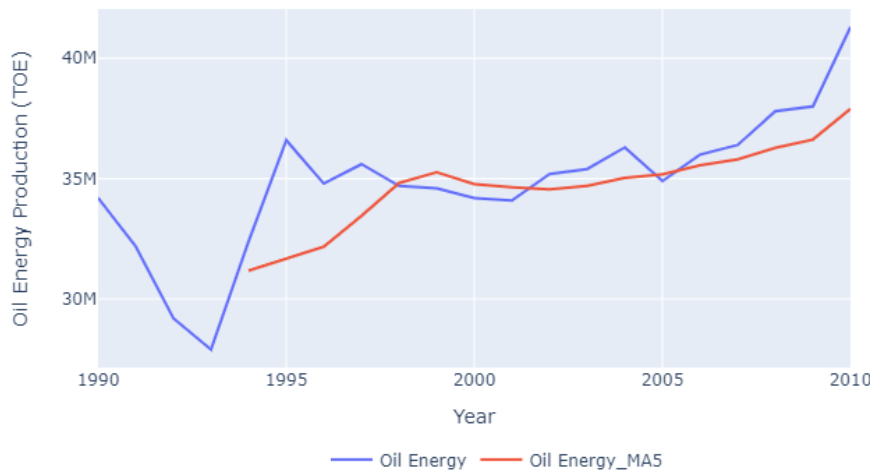

3. Overall Progress: Overall progress of Oil energy in the world since 1990. The values on the bar shows the increase/decrease in the energy generation in the successive years.

- 2000 saw the highest increment of 69M in oil energy production.
- 2010 had 38M production.
- 1992 saw a whopping drop of 50M.

India's Contribution: Progress of India in Oil energy contribution since 1990.

India's Oil Energy Production

- India's Oil energy increased rapidly since 2006.
- India's production fell from 34M in 1990 to 29M in 1993.
- India had 1.5% of world contribution in Oil energy production in 2010.

Conclusion

- America is the leading continent in providing highest Oil energy production.
- Iran is the leading contributor in Asia.
- India's growth is increasing at a steady rate.
- 79% of world contribution comes from top 10 countries.
